Introduction

These heaters must not be installed in wet rooms or other high humidity areas.

These heaters are designed for use on standard two-pipe pumped central heating systems with a maximum water temperature of 86°C and a maximum pressure of 6 bar (88lbs/in.).

Pipe connections are 22mm, in order to obtain maximum efficiency and output the flow should be connected to the header tube which is nearest the exiting air side of the heat exchanger.

When mounting the zone valve to the system pipework the arrows indicating flow direction must be observed and respected.

These heaters are classified as a fixed appliance and the electrical connection should be via a 3A fused spur. The fused spur must not be directly below the heater but should be accessible after completion of the installation. All heaters must be earthed.

To avoid the possibility of vibration these units must be fitted to a flat even surface.

Please note that the guarantee may be invalidated if this product is not installed and used in accordance with these instructions.

Note: 15mm pipe may be used for heating capacities of up to 12kW. (This is subject to compliance with CIBSE recommendations)

Declaration of conformity

EC Declaration of conformity
We, Smith's Environmental Products Limited
1-2 Blackall Industrial Estate
South Woodham Ferrers
Chelmsford
Essex CM3 5UW
Tel: 01245 324900 Fax: 01245 324422

Declare under sole responsibility that the products:

Product name:
Caspian

Product range:
Caspian CTFF sizes 60 & 120

Conform to the following European
Union directives:
Low Voltage Directive 2014/35/EU
Safety of household electrical appliances:
EN 60335-2-80:2003, +A1:04 +A2:09
EN 60335-1:2012 +A11:14 +A13:17 +A14:19
+A1:19 +A2:19

Electromagnetic compatibility (EMC)
EN 55014-1:2017
ETSI EN300 328: V2.1.1:2016
EN55014-2:2015

This Declaration is made on behalf of Smith's
Environmental Products Limited.

Symbols

This manual contains information and
prescriptions marked by the following symbols.

Ignoring these safety provisions
marked by the symbol "caution:
hazard" may endanger the safety
of people.

Ignoring these safety provisions
marked by the symbol "caution:
electricity" may endanger the
safety of people, as well as the
integrity of things.

The removal of the screws can
cause the output of hot fluids
under high pressure from heating
system. Drain the system or close
the isolating valves.

High temperature surface. Take
utmost care to prevent people
from getting in contact with the
hot surfaces of the appliance.

Important safety and installation instructions

Prior to installation, read these installation and operating instructions. The installation and operation should also be in accordance with national regulations and accepted codes of good practice.

This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

To guard against injury, basic safety precautions should be observed, including the following:

1. Read and follow all safety instructions and all the important notices on the appliance before installing, using and maintaining the appliance. Failure to do so may cause personal injury or damage to the appliance or installation.
2. Always disconnect electrical supply before putting on or taking off parts and whilst the equipment is being installed, maintained or handled. Never work with bare feet and/or with wet hands.
3. A risk assessment should always be carried out prior to work, Correct PPE should be worn.
4. To avoid possible electric shock, special care should be taken since water is used with electrical equipment. Carefully examine the appliance before and after installation. Do not operate the appliance if it has a damaged supply cord or enclosure, or if it is malfunctioning or it is dropped or damaged in any manner. Inspect the appliance in accordance with manufacturers instructions.

The appliance should not be electrically supplied if there is water on parts not intended to be wet.

5. Risk of scalding. To avoid injury before any servicing operation wait until the water has cooled inside the appliance. Do not touch the fluid or the appliance when temperature is higher than 60°C.
6. Improper use.
This is an appliance to be used in heating systems with clean water without abrasive particles.

Do not use this appliance:

- With liquids other than water (e.g. flammable liquids, etc.) (EN60335-2-51);
- In locations where special conditions prevail, such as the presence of a corrosive or explosive atmosphere (dust, vapour or gas) (EN60335-2-51);
- For other than intended use.

7. Installation.

The appliance must be mounted in a stable/fixed position in a dry, well ventilated, frost-free, waterproof and protected place, with sufficient ventilation around it. Make sure that the appliance is securely and correctly installed before operating it and that there is enough room around it for maintenance operations, dismantling, checking for free inspection.

The maximum ambient temperature at which the appliance is to be used is 40°C (EN60335-2-51).

8. Electrical connection

Important: Connection to the power supply must be effected by means of a fixed power cable via a two pole isolating switch (fused spur) with a minimum contact opening of 3mm.

The fused spur must not be directly below the heater but should be accessible after completion of the installation. All heaters must be earthed.

Electrical connection must be carried out by a qualified electrician and in accordance with local regulations and both data on the name-plate and the appropriate diagram inside the terminal box cover.

Follow all safety standards.

9. All electrical work should be carried out in accordance with current IEEE regulations; we recommend the appliance is protected by a Residual Current Device (RCD or Ground-Fault Circuit-Interrupter) with a rated residual operating current not exceeding 30mA.

10. Prior to any modification being made to the equipment, it must be agreed with and authorised by the manufacturer. Original spare parts and accessories authorised by the manufacturer are integral part contributing to the safety of the equipment and of the appliance. The use of non original components or accessories may endanger the safety and causes the termination of the warranty. Safe operation is only assured for the applications and conditions described in Application of this manual.

Non-observance of the safety instructions results in the loss of any claims to damages.

The indicated limit values are binding and cannot be exceeded for any reason whatsoever.

KEEP THESE INSTRUCTIONS FOR FUTURE REFERENCE.

EC 120	Low	419.30	116.50	0.14	16.00	34.00
	Mid	549.65	152.68	0.26	40.00	42.00
	High	680.00	188.89	0.34	64.00	49.96

*a typical room is taken as a room with a volume of 173m³ and a reverberation time of 0.8 seconds at 500 Hz with one unit installed, situated against a wall or ceiling (radiating noise in a quartersphere). No allowance is made for attenuation provided by ceilings, enclosures or ductwork. Outputs based upon testing at EN442: 2014 using mean water temperature and an entering air temperature of 20°C with a 10°C temperature drop between flow and return.

Model Reference	Fan Speed	Hydraulic Resistance (KPA)	Nominal Weight (KG)	Water Capacity (L)
EC 60	Low	1.38	23.00	0.92
	Mid	1.69		
	High	2.00		
EC 120	Low	17.78	45.00	2.08
	Mid	20.59		
	High	23.40		

Correction factors

Mean Water Temp °C		45 - 80			
Water Temperature drop °C		5	10	15	20
Entering Air Temperature °C	15	1.13	1.10	1.07	1.05
	18	1.08	1.05	1.02	0.99
	20	1.04	1.00	0.95	0.89
	25	0.93	0.91	0.89	0.86

Factors are approximate data based upon a standard coil.

How to calculate Mean Water Temperature (ΔT)

Mean water temperature (ΔT)

=

Flow temperature + Return temperature

2

Control mounting options/configurations

Internally mounted - To be specified at time of order (built to order)
(tamper proof)

Wall mounted - Standard product
(remote)

Wiring diagram - Master Slave

Internal control option (control adjacent to wiring panel)

Remote / flush control options (electrical connection moved adjacent to wiring panel)

Wiring diagram

Standard Caspian

Caspian EC with T1 and T2 stats

Note: If your heater was built after October 2014 or the colours shown in this diagram do not match those on your unit please refer to the Key:

- +10V (Red)
 - Control (Yellow)
 - Ground (Blue)
 - Tacho (White)
- = Blue
= Grey
= Black
= Brown

Installation

1. Unlock the front access panel

Unlock and lower the front access panel using the keys supplied. The keys come cable tied to the back of the heater.

2. Fix unit to wall or ceiling

Fix the unit to the ceiling or wall via suitable fixings, able to withstand a minimum of 4 times the product weight. If fitted to suspended ceilings or similar then suitable means of support such as threaded rods or chains must be used. If used, mounting of a suspension system should be installed as per manufacturer guidelines and by a suitable qualified person.

3. Connect the pipes

Connect the heating system flow and return pipes to the heater pipe work. Pipe entry/exit can be made through either the back of the unit or by using the pipe knockouts on the bottom of the unit. Do not use soldered fittings to connect the heater pipe work as the heat generated may cause damage to internal wiring and components. Compression fittings should be used. Pipework must only enter in intended cut outs or knockouts on the header connection side of the heater.

Note: 15mm pipework suitable for heating outputs up to 12kW, 22mm should be used where output exceeds 12kW (this is subject to compliance with CIBSE recommendations).

Note: The system must be flushed prior to fitting this heater. Failure to comply with this may effect the warranty.

Isolating valves must be fitted. We recommend the use of full-flow service valves. The valves should be accessible after completion of the installation. We also advise the fitting of an air vent at the highest point on either the flow or return pipe to remove any air trapped within the system. Valves must have the ability to regulate flow for balancing.

4. Open the service valves

Having filled the heating system with water, open the full flow service valves and check for water leaks. Remove any trapped air from the unit via the built in bleed screws as shown in the diagram below.

5. Electrical supply and electrical connection

Electrical supply to the unit must be nominal 230VAC 50~Hz.

Electrical connection to the product is via a 3 way terminal block inside the product (L, N, E), on electrical panel.

Connect the power supply from the fused spur (3 Amp) to the heater terminal block marked Supply E N L via the cable entry hole in the top chassis of the heater.

The fused spur must not be directly below the heater and must be accessible after the installation is complete.

All electrical work should be carried out in accordance with current IEEE regulations.

6. Connect a room thermostat

To connect a room thermostat (not supplied), firstly isolate the unit from the power supply, then remove the thermostat link shown in the diagram on page 9 and replace it with the two thermostat wires. The connector block uses a push-fit system and to remove and refit the wires it is necessary to depress the button next to the relevant connection.

For further information refer to the room thermostat manufacturers instructions.

Commissioning

1. Turn on the electrical supply at the fused spur.
2. Turn the thermostat control (if fitted) to maximum.
3. Turn on the central heating system.
4. Where an adjustable LTC has been fitted, set it to the desired temperature.
5. If these heaters are installed on the same circuit as panel radiators balance the central heating system.
6. If the installation is working correctly remember to reset the thermostat control (if fitted) to its normal setting.
7. Set the fan speed control to the desired position. Note: Not applicable if fitted with a Proportional Heat Output Controller (PHOC).

8. Set the dial to the speed required by referencing the table included with the product and shown below.

CASPIAN EC FAN SPEED VOLTAGE SETTINGS VDC		
Model	60	120
Low speed	2.4	1.8
Mid speed	3.7	3.3
High speed	5.8	5.1

Fan speed settings label

9. Lift up and close front access panel, ensure this is secure and locked in place with keys provided.
10. Please leave this Installation & User Guide with the user for future reference.

Heating operation

Ensure the central heating system is ON. Switch on the power supply to the unit. Set the thermostat control (if fitted) to the desired temperature. Providing the water temperature in the central heating system is more than 38°C and the thermostat (if fitted) is calling for heat the product will switch on.

It is recommended that the model chosen is capable of maintaining the calculated heat loss at medium heat output enabling the high speed setting to be used for faster heat up and the low speed for maintaining temperature.

Maintenance

Warning! Isolate from the electrical supply before performing any work on the unit.

The internal air filter is removable for servicing. To gain access to the filter unlock and lower the front access panel, remove the 2 screws from the filter enclosure panel and lift out. Carefully lift out and remove filter (see page 10). The filter should be gently tapped to remove any accumulated dust and vacuumed if necessary (approx. every 6 months). We recommend replacing the filters approx. every 2 years depending on environmental conditions.

The coil fins are delicate so take care and only use a soft brush or vacuum cleaner to remove any dust that may have accumulated.

The fan(s) and motors should not require servicing. Please contact your supplier if damaged.

To replace filter use reverse the removal instructions and ensure the lower front access panel is securely locked.

Please note in the event of an engineer's visit, Smith's Environmental Products Ltd reserve the rights to apply a call-out charge should the fault prove to be with the system or installation and not the heater appliance.

Fault finding

Providing the power supply is switched on the room thermostat (if fitted) is calling for heat the heater will switch on and off automatically with the central heating system.

In the event of any difficulty, please contact us on +44 (0) 1245 324560.

It will be helpful if you do not disconnect the heater from the central heating system.

Fault	Checking/Solution
The fan does not run on any speed setting	Check the power supply is switched ON Check the fuse in the fused spur Check the wiring at the fused spur If thermostat is fitted ensure it is calling for heat Check the central heating is switched ON Vent any trapped air from the system (with the heating system turned OFF)
No heat output	Check flow and return pipes are hot Vent any trapped air from the system (with the heating system turned OFF) Check the central heating is switched ON If a thermostat is fitted ensure it is calling for heat Balance the central heating system if installed on the same circuit as panel radiators and increase the circulating pump speed if required Increase the boiler water temperature

Spares

See the table below to find the product code for any spares that maybe required for your Caspian product.

Component	Model				
	60	90	120	150	180
Filter x 1	03-6015	03-6016	03-6017	03-6041	03-6043
Fan	06-0321 x 1	06-0321 x 2	06-0321 x 2	06-0321 x 3	06-0321 x 4
Coil	02-0301	02-0303	02-0304	02-0343	02-0382

Accessories

Smith's offer a range of accessories which can be used in conjunction with this product. This includes:

- Remote Room Thermostats (wired and wireless inc tamper proof option)
- Remote (wired) room thermostat Siemens speed and temperature control
- Wall mounted control switch
- Adjustable low temperature cut-out (LTC)
- Plinth (for floor standing application)

- Caspian linking kits (EC only)
- External control harness (EC only)
- Proportional heat output controller (PHOC)
- Thermostat T1
- Flexible hoses and quick connector kits

For further information on accessories or spares please contact either your supplier or Smith's Environmental Products Ltd or visit www.SmithsEP.co.uk

Registering your product

Thank you for purchasing a Smith's product. It has been designed and manufactured to the highest quality standards to ensure it gives you efficient and trouble-free service for many years. We are committed to achieving the highest standards and our faith is supported by a free parts and labour guarantee with every product.

For more information on the warranty period for this product please visit our website smithsep.co.uk/product-registration/

This gives you the peace of mind that in the unlikely event of product failure, we will repair or replace the product completely free of charge providing the product has been installed, used and maintained in accordance with the instructions. Your statutory rights are not affected by this warranty.

It is important to register as soon as possible online at: smithsep.co.uk/product-registration/. This will ensure you will receive prompt and efficient service if your product requires attention within the warranty period. If you do not register your product, you will be required to produce proof of purchase prior to receiving service.

For more details please visit our website: SmithsEP.co.uk

YOUR PRODUCT

Disposal

As part of the policy of continuous product improvement, Smith's Environmental Products LTD reserves the right to alter specification without prior notice.

Products with this symbol (crossed out wheellie bin) cannot be disposed as household waste. Old electrical and electronic equipment must be recycled at a facility capable of handling these products and their waste by-products. If you are purchasing replacement equipment your retailer may offer a 'take back' scheme, or will be able to give details of the nearest approved authorised treatment facility. Proper recycling and waste disposal will help conserve resources whilst preventing detrimental effects on our health and the environment.

WEEE Registered Code: WEE/ED0093VV

After sales

If you experience any problems with the use of your product, please contact our after-sales office +44 (0) 1245 324560.

For product information, customer services or sales support call us on +44 (0) 1245 324900

For the Republic of Ireland, contact MT Agencies on 01 864 3363

Notes

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper has a slight shadow on the right side, suggesting it's resting on a surface. There is no handwriting or other markings on the paper.

Happy to help

Smith's Environmental Products Ltd is one of the leading manufacturers of heating and cooling products in the UK. We are committed to achieving the highest standards and our faith is supported by a free parts and labour guarantee with every product (see our website for more information). Our customer service is second to none and we are happy to offer any help and guidance that you might need.

Stockists

All products are available nationally from Builders' Merchants, Plumbers' Merchants, Heating Equipment Distributors and Kitchen Equipment Distributors. In the event of difficulty, please contact us or visit our website SmithsEP.co.uk for details of your nearest stockist.

Information and advice

Full technical specifications and list prices is available to download from our website or in hard copy from our office. Also available on our website are price lists, individual product data sheets, installation & user guides, where to buy, who to contact and a media centre.

Alternatively contact our office 9.00am to 5.00pm Monday to Friday.

As part our commitment to continuous improvement Smith's Environmental Products may change the specifications of its products without prior notification or public announcement. All descriptions, illustrations, drawings and specifications in this publication present only general particulars and shall not form part of any contract. All dimensions are in mm unless otherwise stated. Please visit the website for the most up to date information.
