

An Introduction to Heating and Cooling using trench units

A CIBSE approved course contributing 45 minutes towards annual CPD requirement.

Main topics covered:

To provide an overview of trench heating/cooling and how to specify it:

- Applications for Trench Heating and Cooling
- Considerations when specifying trench heating and cooling
- Important product design considerations
- Current Test Standards
- Sound
- Pitfalls and Common Design Considerations
- Product demonstration

For more details:

Please contact your local representative, or Smith's Head Office on 01245 324900

Objectives:

On completion delegates will:

- be aware of the suitable/unsuitable applications for trench convectors
- aware of the considerations that are needed when specifying trench convectors
- understand the key components of trench convectors and their role
- be able to make informed product selections on the appropriate trench products for specific applications
- have an understanding of the prevalent legislation regarding trench heating/cooling
