

Space Saver Economy

Space Saver Economy is a new economy version of our best-selling Space Saver plinth heater. Developed using the same technology as the regular SS5 and SS7 models it is available at a price to match your kitchen design, size and budget.

Features

- Space Saver Economy eliminates the need for a wall mounted kitchen radiator – freeing up valuable wall space for additional appliances, units and work surface
- Sits neatly in the plinth under a kitchen unit
- It connects directly to the Central Heating System, so it is very efficient and economical way to heat your kitchen
- Suitable for installation in all kitchen styles and is supplied with a white painted fascia grille
- The Space Saver Economy has a 2-year parts and labour guarantee
- Supplied with electrical cable
- Installation hoses are not included, but can be ordered separately
- Available in two sizes Space Saver 5 Economy which is suitable for kitchens up to 37m², and Space Saver 7 Economy which is suitable for kitchens up to 46m²

Applications

- Kitchen
- Utility

Motor

AC

Finish

Fascia grille: White

Installation

Correct fascia grille opening must be cut to allow sufficient air intake 20mm clearance above unit required.

Model secured to plinth by two screws through fascia grille. Unit must be earthed.

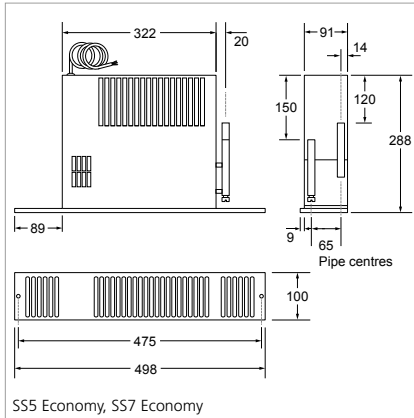

Suitable for two-pipe central heating systems only.

Commissioning

Check water temperature is hot enough to activate low temperature cut-out thermostat (LTC). Vent screw accessible through fascia grille
